

MORE BENEFITS. FEWER ASTERISKS.

## We're a different kind of health benefits company.

We partner with brokers across the nation to improve the way people purchase and access healthcare. **We do our job better so you can, too.**

With Gravie, you'll get health plans that employers can count on and employees can love.

### Our background

Gravie's co-founders have started and led some of the most innovative, industry-changing healthcare companies to date, including Bloom Health where they pioneered the private exchange model of financing health benefits, RedBrick Health where they launched an industry-leading health earnings system, and Definity Health, where they were involved in the creation of the personal care account, the predecessor to the health savings account.

Like their previous companies, **Gravie was founded on the basis that the healthcare industry should be driven by the needs of the consumer.** For nearly a decade, Gravie has been disrupting traditional benefit models, drastically improving the way people purchase and access healthcare. Gravie's Comfort® product reflects our history of innovation and high-touch member services through our industry-leading enrollment and customer support platforms, integrated into our third-party administration company and wholly owned insurance company.

Comfort is the **first-of-its-kind health plan** that eliminates cost barriers and provides value to all participants, promoting better long-term health and improved customer satisfaction.

Comfort provides 100% coverage on most common healthcare services, at a cost comparable to traditional group health plans. Copay and HSA options are available.

### Gravie Care. Because we really do care.

When employees enroll in health benefits through Gravie, they get Gravie Care. Gravie Care includes support from a dedicated team of licensed experts available to help members select their out-of-pocket maximum, enroll in coverage, and navigate the complexities of health benefits throughout the year.

“The customer service is definitely better with Gravie versus your mainstream carrier.”

Gravie member
