

GravieRx: A smarter pharmacy benefit

Lower drug costs shouldn't mean a more complicated benefit. GravieRx pairs pharmacist-led clinical programs with smart, automated savings, so employers spend less and members get one simple, seamless experience.

Clinical first, pharmacist led

Traditional PBMs have misaligned incentives that can drive up drug spend. GravieRx is built differently. We rely on Express Scripts for operational excellence: claims processing, a broad pharmacy network, and purchasing scale. On top of that, we offer our own clinical programs, with pharmacists, not profit margins, in charge.

- **Proactive Care:** Programs customized for key drugs, encouraging proactive care and lowering spend.
- **Utilization management:** Rigorous reviews reserve high-cost drugs for the members who benefit most, using comprehensive clinical criteria and medical documentation.
- **Formulary:** Active, ongoing management based on lowest net cost for employers, not just rebate value.

The GravieRx toolkit:

- **Lower-cost generics, automatically.** Generics are paid at the lower of the Express Scripts rate or the GoodRx discount, applied right at the pharmacy.*
- **Pharmacist-led therapy optimization**. Pharmacists proactively review prescriptions, adherence, and specialty utilization, then work with members, providers, and pharmacies to execute lower-cost, clinically appropriate options.
- **Dynamic sourcing.** High-cost prescriptions are routed to the most cost-effective channel, including discount programs, alternative pharmacies, and specialized vendors for complex drug classes. No added work for employers.
- **Personalized engagement and incentives.** Proactive, multi-channel outreach identifies savings opportunities and encourages members to make value-based choices, such as biosimilars over branded biologics, with incentives for making the switch. Our pharmacists support the change behind the scenes, working with the member's prescriber and pharmacy.
- **Specialty savings.** SaveOnSP connects eligible members to manufacturer copay assistance, reducing out-of-pocket costs to as little as $0** while using that same manufacturer value to reduce the groups' claims costs. Accredo Specialty Pharmacy layers on personalized care, home delivery, and 24/7 access to specialized pharmacists and nurses.

How we partner and stay accountable

GravieRx works alongside established partners like Express Scripts and Accredo, closely supporting employers and members throughout their pharmacy journey. A dedicated team of PBM specialists and clinical pharmacists stays ahead of issues through continuous claims monitoring, rigorous auditing of prior authorization and step therapy decisions to hold a gold standard for accuracy, and regular market checks to keep pricing competitive.

Built to evolve

The pharmacy and specialty drug market is rapidly evolving, and you can expect our GravieRx toolkit to stay ahead of the curve. We evaluate new approaches daily, adopting what the market proves out and building our own where gaps remain. As new savings and clinical opportunities emerge, GravieRx evolves with them.
